

Tactical Airlift: Observations Concerning European Distribution System Operations: Nsiad-89-135

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO reviewed the status and operational effectiveness of the Air Force European Distribution System (EDS). GAO found that: (1) EDS was operating from one forward stockage site, and the Air Force was considering activating two additional sites; (2) the Air Force has not quantified the effect of EDS on tactical aircraft readiness, and available data do not show that EDS has reduced the number of non-mission-capable aircraft; (3) the unit cost of shipping material through EDS was significantly higher than the cost of shipping through other military carriers; (4) usage of EDS C-23 aircraft totalled only 37 percent of available capacity; (5) while the Air Force designed EDS as a wartime system, it was taking steps to ensure efficient peacetime EDS operation; and (6) the Air Force was considering more extensive use of reserve forces for tactical airlift missions. This item ships from La Vergne, TN. Paperback.

Reviews

This pdf is fantastic. Sure, it can be engage in, nevertheless an interesting and amazing literature. Its been developed in an remarkably straightforward way and is particularly merely after i finished reading through this publication where in fact transformed me, change the way in my opinion.

-- **Mr. Lee Simonis PhD**

This is basically the finest publication i actually have go through till now. We have read and i also am confident that i am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Prof. Adell Lubowitz**
